Healthcare · GA · SIC 8062 · Healthcare

TL;DR — 30-SECOND SKIM MEDIUM

- Grady is building a \$1B phased South Fulton campus with three distinct security procurement windows: freestanding ED opening June 2026 (imminent), medical office building 2028, and 200-bed Level 3 trauma center 2031, the ED spec must be finalized now.
- Two violent incidents in April 2026 (a staff homicide and an on-campus mass shooting with 4 victims) follow a 2018 AHA case study naming Grady as a documented workplace violence example, security controls have not kept pace with threat volume at this 1,000-bed Level 1 trauma center.
- CEO retirement announced March 18, 2026 alongside the campus announcement, an incoming CEO who has not yet been named will own both legacy infrastructure decisions and the clean-sheet South Fulton security spec, creating a 90-day vendor audit window.

Hauptert — President and Chief Executive Officer (retiring; advisory role through 2027)

Economic Buyer

MEDIUM

20%

● Role ● Recency ● Arc ● Voice ● Topic ● Auth

Hauptert is the outgoing CEO and maps to economic buyer, they approve but rarely champion day-to-day vendor evaluation. As a lame-duck executive focused on the South Fulton advisory role and fundraising, Hauptert's decision-making authority on new security infrastructure contracts is diminishing. The real champion and economic buyer for both the South Fulton ED spec and any legacy campus modernization will be the incoming CEO, whose identity is not yet public.

Validate: *Who on your leadership team is driving the security infrastructure specification for the South Fulton ED, is that coming from facilities, IT, or the incoming CEO's office?*

2026-03-18 — CEO retiring but will continue to serve Grady in an advisory role through 2027, providing strategic guidance on the South Fulton medical campus and supporting philanthropic and capital fundraising efforts.

Warm intro: Geographic overlap: Hauptert is based in Atlanta, GA, aligns with Andy's Atlanta geographic focus and Atlanta DNB network. Consider Atlanta DNB connections for a warm introduction path to Grady leadership.

SECONDARY

MEDDIC QUALIFICATION

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
M Metrics	Grady Health System operates a large urban safety-net hospital (1,000+ beds, Level 1 trauma center) and is building a \$1B phased South Fulton campus with three distinct facilities (freestanding ED June 2026, medical office building 2028, 200-bed hospital 2031). Verkada can quantify value around: (1) eliminating NVR/server infrastructure across both the existing Atlanta campus and the new South Fulton campus, (2) unifying access control and video across what will be at least two major campuses plus satellite clinics, (3) reducing incident response time in a high-violence-exposure environment. Grady was named in a 2018 AHA case study on workplace violence and experienced multiple violent incidents in April 2026, and (4) producing HIPAA-compliant audit trails for physical access controls following a documented patient data breach (~900 individuals) and ransomware attack. company-bg: \$1B South Fulton campus announced March 2026 with three phases across five years company-bg: AHA case study (2018) named Grady as featured example of workplace violence management tech-and-pain: Two violent incidents in April 2026, staff homicide and mass shooting with four victims on/near campus tech-and-pain: Patient data breach ~900 individuals (Becker's Hospital Review) plus ransomware attack affecting payroll (Decaturish) company-bg: Size indicator, one of the largest urban safety-net providers in the US per AHA	☐ "How many cameras does Grady currently manage across the main Atlanta campus, and what's the age of the NVR/DVR infrastructure behind them?" <i>Quantifies the existing footprint to size the replacement opportunity and calculate TCO savings from eliminating on-prem servers.</i> champion high ☐ "When the South Fulton freestanding ED opens in June 2026, what's the projected camera and door count for that facility?" <i>Sizes the immediate greenfield opportunity and determines whether the ED security spec is still open.</i> champion high ☐ "After the April incidents, did leadership put a dollar figure on what improved detection or faster response time would have been worth?" <i>Ties the pain to a quantifiable business metric that justifies investment to the board.</i> economic buyer medium	MEDIUM SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
E Economic Buyer	The outgoing CEO (Hauptert) is retiring and transitioning to an advisory role through 2027. The incoming CEO, not yet named publicly, will be the primary decision-maker for infrastructure investments across both the existing campus and the South Fulton buildout. For a public hospital system governed by the Grady Memorial Hospital Corporation Board of Directors and overseen by the Fulton County Board of Commissioners, board approval is likely required for security infrastructure contracts of this scale. The CSO or VP of Operations (titles not identified in available data) would be the functional economic buyer for security spend. company-bg: CEO Hauptert retiring, announced March 2026, advisory role through 2027 (AJC, Rough Draft Atlanta) company-bg: Fulton County Board of Commissioners and Grady Memorial Hospital Corporation Board both approved \$1B South Fulton campus : Only named individual is Hauptert (CEO, retiring); no CSO, VP Operations, or Director of Security identified	☐ "Has the incoming CEO been selected yet, and have they started reviewing vendor relationships or infrastructure plans for the South Fulton campus?" <i>Identifies whether there's a new decision-maker in seat who will own security infrastructure decisions.</i> influencer high ☐ "Who owns the physical security budget at Grady today, is it under IT, facilities, or a dedicated security department?" <i>Determines where budget authority sits and who signs off on security infrastructure purchases.</i> champion high ☐ "For the South Fulton campus, does the Board of Directors need to approve the security infrastructure contract separately, or is it included in the \$1B capital approval?" <i>Clarifies the procurement approval process and whether an additional board vote is required.</i> economic buyer medium	INFERENCE WEAK

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
D Decision Criteria	Based on Grady's Healthcare vertical profile and documented pain, decision criteria will likely center on: (1) workplace violence detection and response. Grady has a multi-year documented challenge here per AHA and recent 2026 incidents, (2) HIPAA physical safeguard compliance, the data breach and ransomware attack create audit pressure on physical access controls for server rooms, medication storage, and data centers, (3) multi-campus unified management, the South Fulton campus creates a two-campus problem requiring a single pane of glass, (4) ED security, as a Level 1 trauma center in urban Atlanta receiving gunshot victims regularly, ED perimeter and lockdown capability is critical, (5) greenfield infrastructure cost, the South Fulton campus is a clean-sheet decision where total cost of ownership vs. traditional NVR-based approaches will be evaluated. company-bg: key_drivers_present, workplace_violence, HIPAA, ED_security company-bg: typical_pain_present, access_control_not_integrated_with_video, no_real_time_alerting_for_elopement, badge_management_across_campuses tech-and-pain: Pain hypothesis on workplace violence gap between documented program and real-time detection capability tech-and-pain: Pain hypothesis on cyber-physical convergence following ransomware and data breach tech-and-pain: Pain hypothesis on greenfield fragmentation risk across three South Fulton phases	☐ "After the ransomware attack and data breach, did your compliance or IT team update the requirements for physical access controls, particularly for server rooms and areas with patient data?" <i>Confirms whether HIPAA physical safeguard requirements are actively driving procurement criteria.</i> championhigh ☐ "For the South Fulton campus security spec, is there a preference for cloud-managed infrastructure, or does Grady's IT team require on-prem servers for security systems?" <i>Identifies whether there's an on-prem-only mandate (a disqualifier) or openness to cloud-managed security.</i> influencerhigh	MEDIUM SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
D Decision Process	Grady Health System is a public hospital system, the Grady Memorial Hospital Corporation Board of Directors governs operations, and the Fulton County Board of Commissioners provides oversight. The \$1B South Fulton campus required both boards' approval, suggesting major infrastructure contracts go through a formal approval process. As a public entity in Georgia, Grady can leverage cooperative purchasing vehicles (Sourcewell contract 041524-VRK, OMNIA contract R250206, HGACBuy contract SE05-26) to streamline procurement without a full RFP. The CEO transition adds complexity, decisions may be deferred until the incoming CEO is in seat, or the outgoing CEO may fast-track South Fulton analysis phase decisions before departure. company-bg: Fulton County Board of Commissioners and Grady Memorial Hospital Corporation Board both approved \$1B campus plan company-bg: CEO Hauptert retiring with advisory role through 2027 focused on South Fulton strategy : Verkada holds OMNIA contract R250206, available for public-sector purchase without full RFP : Verkada on HGACBuy contract SE05-26 via Pavion and APIC dealers at 5% discount : Sourcewell cooperative purchasing vehicle available for Georgia public entities	☐ "Has Grady's procurement team used cooperative purchasing vehicles like Sourcewell or OMNIA Partners for previous technology purchases?" <i>Determines whether cooperative purchasing is a realistic path or if Grady's procurement rules require full RFP regardless.</i> influencermedium ☐ "Is the security infrastructure decision for the South Fulton freestanding ED being finalized before or after the CEO transition?" <i>Determines urgency, if analysis phase security spec must be locked before the ED opens in June 2026, there's a hard deadline.</i> championhigh	MEDIUM SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
I Identify Pain	Grady's highest-confidence pain is the gap between its documented workplace violence management program and its actual real-time detection and response capability. Two violent incidents in April 2026, a staff homicide (technologist Shaunterrio Hudson, fatally shot) and a mass shooting on or near campus with four victims, occurred despite Grady being featured in a 2018 AHA case study specifically about managing workplace violence. This suggests the existing security infrastructure cannot detect, alert, or respond fast enough. Compounding this: a patient data breach (~900 individuals) and a ransomware attack create HIPAA physical safeguard audit pressure. The \$1B South Fulton campus creates an immediate greenfield decision window, the freestanding ED opens June 2026 and the security spec for that facility must be finalized imminently. tech-and-pain: Two April 2026 violent incidents, staff homicide (Atlanta News First) and mass shooting with four victims (YouTube CMO update) company-bg: AHA 2018 case study names Grady as featured example of workplace violence management challenges tech-and-pain: Patient data breach ~900 individuals (Becker's Hospital Review) tech-and-pain: Ransomware attack affecting payroll (Decaturish) tech-and-pain: South Fulton freestanding ED opening June 2026, three distinct procurement windows over five years	☐ "After the April incidents, what did the post-incident review identify as the primary gap, was it detection speed, camera coverage, response coordination, or something else?" <i>Pinpoints the specific capability gap Verkada can address, moving from general pain to a targeted solution conversation.</i> champion high ☐ "When the mass shooting happened near campus, how long did it take your security team to identify the threat and initiate lockdown?" <i>Quantifies the response time gap. Verkada's real-time alerting and lockdown integration directly addresses this.</i> champion high	HIGH SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
C Champion	No named champion candidate identified. The only named individual in leadership data is CEO Hauptert (retiring). Grady's Director of Security or Director of Public Safety, title and name unknown, is the most likely champion based on the Healthcare vertical persona mapping (Director_of_Security_Healthcare: MEDDIC role=champion). This person owns daily security operations at a 1,000-bed Level 1 trauma center with documented workplace violence challenges and would be the strongest internal advocate for a platform that improves incident detection and response. The Violence Intervention Specialist posting (hiring-signals) confirms Grady has an active violence prevention program, suggesting a security leadership function exists but was not captured in available data. : Only named individual is Hauptert (CEO, retiring), no security leadership identified : status=insufficient_data, no individuals scored hiring-signals: Violence Intervention Specialist posting confirms active violence prevention program at Grady company-bg: AHA case study confirms formal workplace safety initiatives, implies a security operations function exists persona/verkada-se.yml: Director_of_Security_Healthcare is mapped as champion role for Healthcare vertical	☐ "Who leads physical security operations at Grady today, is there a Director of Security, Director of Public Safety, or similar role?" <i>Identifying the champion is the #1 priority. This person owns the daily pain and has the strongest motivation to advocate for Verkada internally.</i> influencer high ☐ "Does the security operations team report into IT, facilities, or its own department?" <i>Determines the champion's reporting line and budget authority, critical for mapping the decision process.</i> influencer high ☐ "Is Grady's security staffed internally or through a contract security firm like Allied Universal or Securitas?" <i>If contract security, the champion may be a facilities or operations leader rather than a dedicated security director.</i> influencer medium	INFERENCE WEAK

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
C Competition	No incumbent security vendor was identified in any analysis step output. No displacement vendor hits were found in tech-and-pain. HGACBuy data shows competitors on the same contract vehicle (SE05-26) including Avigilon/Alta (Motorola), Axis, Genetec, Hanwha, Honeywell, Milestone, and Bosch, but none are confirmed as Grady's incumbent. OMNIA Partners data shows Genetec on the same 'Weapons and Threat Detection' contract category (R250204), and Everon, Convergent, and Schneider Electric on facility security integration contracts. Without knowing Grady's current vendor, the displacement angle cannot be sharpened. tech-and-pain: displacement_vendor_hits is empty array, no incumbent identified : Competitor manufacturers on SE05-26 include Avigilon/Alta, Axis, Genetec, Hanwha, Honeywell, Milestone, Motorola, Bosch : Genetec holds OMNIA contract R250204 in same category; Everon (R220701), Convergent (R220702), Schneider Electric (R220703) hold facility security integration contracts hiring-signals: No security vendor or VMS platform mentioned in any job posting	☐ "What camera and access control systems does Grady use today at the main Atlanta campus, and how old is that infrastructure?" <i>Identifies the incumbent vendor and system age, which determines whether this is a rip-and-replace, augment, or greenfield conversation.</i> champion high ☐ "Is the existing video management system server-based or cloud-managed? And who maintains those servers, internal IT or an integrator?" <i>Determines whether the IT burden argument resonates and whether there's an integrator relationship to navigate.</i> champion high	INFERENCE WEAK

Grady is deploying a \$1B greenfield South Fulton campus across three phases (ED opening June 2026, medical office building 2028, 200-bed hospital 2031). Without a deliberate decision now, each phase will likely procure security infrastructure independently, replicating the fragmented multi-vendor problem Grady already faces at its existing Atlanta facilities.

ConstructConnect reporting (March 18, 2026) confirms \$1B phased campus: freestanding ED June 2026, medical office building early 2028, 200-bed acute care hospital 2031, three distinct procurement windows across five years (<https://news.constructconnect.com/grady-health-system-unveils-1-billion-south-fulton-medical-campus/>)

Grady Health official press release (March 18, 2026) confirms the campus includes imaging services, surgery center, specialty clinics, pharmacy, rehabilitation, and pediatric care, multi-department facility requiring access control across multiple high-sensitivity zones (<https://www.gradyhealth.org/media-center/grady-announces-new-south-fulton-medical-campus-and-planned-leadership-transition-signaling-the-future-of-care-delivery/>)

Workplace Violence

HIGH

SECONDARY

Two separate violent incidents on or near Grady's campus in April 2026, a staff homicide in Forest Park and an on-campus mass shooting with four victims, expose a gap between Grady's documented workplace violence program and its real-time detection and perimeter response capability. A 2018 AHA case study named Grady as a featured example of workplace violence management, yet incidents continued through 2026, suggesting the program's controls have not kept pace with threat volume.

Atlanta News First (April 14, 2026) reports Grady technologist Shaunterrio Hudson, 36, was fatally shot; a 20-year-old subsequently confessed to the murder, a confirmed staff homicide linked to Grady employment (<https://www.atlantanewsfirst.com/2026/04/14/grady-memorial-hospital-employee-killed-forest-park-shooting/>)

Grady CMO public video update confirms a mass shooting with four injured persons brought to the facility; a separate news report cites Atlanta Police activity at Grady with shots fired on campus (<https://www.youtube.com/watch?v=TrRXfkr9jXI>; <https://www.facebook.com/wsbvtv/posts/this-is-the-scene-at-grady-memorial-hospital-on-wednesday-afternoon-when-police-/673094254851254/>)

2018 AHA case study PDF explicitly names Grady Memorial Hospital as the case example for managing workplace safety and reducing workplace violence, confirming this is a documented institutional challenge with multi-year history (<https://www.aha.org/system/files/2018-11/grady-workplace-case-example.pdf>)

Badge Management Across Campuses

MEDIUM

SECONDARY

Grady's CEO retirement (announced March 18, 2026) alongside the \$1B campus announcement creates a dual leadership disruption: an outgoing CEO whose infrastructure decisions may be deprioritized, and an incoming CEO who will inherit both legacy systems at the main campus and a clean-sheet security decision for the South Fulton campus. New healthcare CEOs typically conduct vendor audits in their first 90–120 days, and the South Fulton phased timeline means the access control and camera spec for the ED must be finalized by late 2026.

AJC (March 2026) confirms 'Grady confirms plans to build new south Fulton hospital, CEO to retire', both events announced simultaneously, indicating the outgoing CEO is managing the announcement but the incoming leader will own execution (<https://www.ajc.com/business/2026/03/grady-confirms-plans-to-build-new-south-fulton-hospital-ceo-to-retire/>)

Rough Draft Atlanta (March 18, 2026) notes the outgoing CEO 'will continue to serve Grady in an advisory role through 2027, providing strategic guidance on the South Fulton medical campus', confirming the incoming CEO will be the primary decision-maker for security infrastructure on the new campus (<https://roughdraftatlanta.com/2026/03/18/grady-health-new-medical-campus/>)

INDIVIDUALS AFFECTED

900

SOURCE

{'url': 'https://www.beckershospitalreview.com/healthcare-information-technology/data-breach-puts-900-patients-at-grady-memorial-hospital-at-risk/', 'title': 'Data Breach Puts 900 Patients at Grady Memorial Hospital at Risk', 'retrieved_at': '2026-05-12T22:42:41.346770+00:00'}

REGULATORY EXPOSURE

Grady has a documented patient data breach (approximately 900 affected) reported in trade press. The absence of a matching HHS OCR record in the most recent 100 large breaches (500+ individuals) suggests this incident may have been below the mandatory large-breach reporting threshold or was reported as a smaller breach. Additionally, Grady experienced a ransomware attack affecting payroll systems. Combined, these incidents indicate active cyber risk posture requiring physical security integration, particularly access controls for server rooms and data center areas, as part of any remediation. HIPAA physical safeguard requirements for access control and audit trails remain a standing compliance obligation regardless of breach history.

COOPERATIVE PURCHASING (4 VEHICLES)

Grady Health System, as a large public-benefit hospital corporation in Georgia operating under Fulton County oversight, can access cooperative purchasing vehicles to avoid a full RFP process. The strongest path for the South Fulton ED security buildout (June 2026 opening) is OMNIA Partners contract R250206 (Verkada, active through March 2028) or HGACBuy SE05-26 (Verkada via Pavion or APIC at 5% discount). Both allow sole-source procurement justification. Key competitive visibility on HGACBuy SE05-26: Avigilon/Alta, Genetec, Milestone, Motorola, Honeywell, and HANWHA are all listed, if Grady's facilities or IT team has existing relationships with any of these through an integrator, lead with the cooperative purchasing angle to reset vendor evaluation on a level playing field.

OMNIA
Partners

TRIGGER EVIDENCE

insufficient_data. The signal matches section contains two entries for cloud_transformation_initiative, both non-matching results. 'HOUSEKEEPING OPERATIONS MANAGER, 2nd Shift, Memorial Hospital, Gulfport, MS' from Compass Group, this is not a Grady posting, matched on keyword 'aws' in standard JD text, and is a housekeeping operations role with zero relevance to security

infrastructure or cloud transformation. 'RN-Specialty-Cath Lab PRN-SMH' from Slidell Memorial Hospital/Ochsner Health in Slidell, LA, also not a Grady posting, matched on keyword 'aws' in unrelated clinical content. Both matches are not relevant and are excluded. No postings in the dataset match any persona trigger persona signals: 'Director of Security,' 'Security Operations,' 'Physical Security Manager,' 'VP of Safety,' 'Global Security,' 'Security Systems Engineer,' or 'Loss Prevention' do not appear in any of the 48 captured postings. No postings reference NVR, DVR, VMS, access control, cloud migration, vendor consolidation, or any physical security infrastructure keywords from the persona trigger persona signals. The preliminary analysis confirms: 'No postings reference physical security infrastructure, facility security expansion, NVR/DVR/VMS systems, access control, security operations, IT infrastructure modernization related to on-prem legacy replacement, or site expansion requiring security buildout.'

GEOGRAPHIC SIGNALS (1)

Atlanta, GA

18 roles · Existing hub, all Grady Memorial Hospital Corporation direct postings are concentrated at Atlanta, GA, consistent with Grady's single-campus 1,000-bed hospital operation at 80 Jesse Hill Jr Dr SE, Atlanta. No new-market or expansion signal. The Correll Pavilion reference in the Emory anesthesiology posting ('opening of Correll Pavilion, a new multispecialty ambulatory surgery center') indicates a capital project at or adjacent to the existing Atlanta campus, but this signal comes from an Emory University posting for physician faculty, not a Grady facilities or security posting.

LAND PLAY

Lead with the South Fulton freestanding ED opening June 2026 as a greenfield land opportunity. This is a clean-sheet security infrastructure decision with an imminent deadline, the ED security spec must be finalized in the coming weeks. Position Verkada Cameras + Access Control as the integrated platform for the ED, then expand to the medical office building (2028) and 200-bed hospital (2031). If the ED spec is already locked, pivot to the existing Atlanta campus, lead with Cameras in the ED and high-violence areas (waiting rooms, parking structures, perimeters) where workplace violence detection is the acute pain.

Target Sites: South Fulton freestanding ED (analysis phase, opening June 2026) as primary land site; Grady Memorial Hospital main campus ED and perimeter as secondary

Scope: analysis phase ED: estimated 30-60 cameras + 10-20 access-controlled doors for a freestanding emergency department. Main campus: 200-500+ cameras across a 1,000-bed Level 1 trauma center (full scope unknown, requires discovery).

POC STRATEGY

Design the POC around workplace violence detection at the existing Atlanta campus ED entrance and waiting area. Install 3-5 cameras with person-of-interest alerting and crowd analytics in the ED waiting room, triage area, and main entrance. Demonstrate real-time alerting when known aggressors return, crowd density thresholds for staffing decisions, and forensic search speed for post-incident investigation. This directly addresses Grady's highest-confidence pain, the gap between their workplace violence program and real-time detection capability. For the South Fulton campus, offer a design consultation showing how Verkada Command unifies both campuses under one dashboard from day one.

Cameras, person-of-interest alerting, crowd analytics, forensic search

Access Control, emergency lockdown, badge management across campuses

Alarms, intrusion detection for perimeter security

Command, multi-campus unified dashboard, real-time alerting, audit trail for HIPAA compliance

CHANNEL PARTNER

Engage Pavion or APIC as the channel partner. Both are listed as Verkada dealers on HGACBuy contract SE05-26 at 5% discount. Pavion is a national fire and security integrator with strong healthcare vertical expertise, they handle large hospital deployments and can manage the structured cabling, door hardware, and low-voltage infrastructure Grady will need for both the existing campus and South Fulton buildout. Convergent is also active on OMNIA Partners (contract R220702) and is a major healthcare security integrator in the Southeast, worth

BUNDLE RECOMMENDATION

Cameras **Access Control** + Alarms
+ Intercoms + Guest

Cameras are the lead product for workplace violence detection, ED security, and forensic investigation. Grady's top pain points. Access Control is bundled immediately because Grady's documented pain includes 'access_control_not_integrated_with_video' and 'badge_management_across_campuses', the South Fulton campus creates a multi-campus badge management requirement from day one. Alarms add perimeter intrusion detection for the new South Fulton campus during construction phases. Intercoms support ED entrance screening and visitor communication. Guest supports visitor management

exploring if Grady has an existing Convergent relationship.

: Verkada available through Pavion and APIC on HGACBuy contract SE05-26 at 5% discount

: Convergent holds OMNIA contract R220702 for Facility Technology Integration & Security System Services

company-bg: Grady headquartered in Atlanta, GA. Pavion and Convergent both have Atlanta-area operations

for a hospital receiving high volumes of ED visitors and patient families.

PROCUREMENT PATH

Direct purchase via Verkada AE or commercial healthcare reseller (Pavion or APIC). Grady Health System is a healthcare entity, not a K-12 or state/local government agency, cooperative purchasing is not the primary procurement path. However, Grady is a public hospital system governed by the Grady Memorial Hospital Corporation Board and overseen by Fulton County Board of Commissioners, which gives it a hybrid public-sector procurement model. If Grady's procurement team accepts cooperative vehicles, OMNIA Partners contract R250206 or HGACBuy contract SE05-26 can streamline the process.

Alt: OMNIA Partners contract R250206. Verkada listed under 'Weapons and Threat Detection Equipment, Services, and Other Solutions' (Government industry)

Alt: HGACBuy contract SE05-26. Verkada available through Pavion and APIC dealers at 5% discount

Alt: Sourcewell contract 041524-VRK, available if Grady qualifies as a public-sector entity under Sourcewell's membership criteria

EXPANSION MOTION

P1 South Fulton freestanding ED (June 2026), cameras + access control for the new facility, plus 3-5 camera POC at existing Atlanta campus ED for workplace violence detection. Estimated 40-80 devices total.

P2 Existing Atlanta campus rollout, replace legacy cameras and access control across the main hospital, parking structures, and perimeter. Unify both campuses on Verkada Command. Add Alarms for perimeter intrusion and Intercoms for ED entrance management. Timing: 2026-2027, aligned with new CEO's infrastructure review.

P3 South Fulton medical office building (2028) and 200-bed acute care hospital (2031), design Verkada into the security spec from the ground up. By this point, Grady has operational proof from analysis phase and analysis phase. Add Guest for visitor management and Sensors for environmental monitoring (pharmacy temperature, surgical suite air quality). Full platform deployment across the entire Grady Health System.

Expand ratio: analysis phase land (40-80 devices) → analysis phase expand (200-500+ devices at main campus) → analysis phase full platform (additional 200-400+ devices across South Fulton campus). Estimated 3-5x expansion from land to full deployment over 5 years.

COMPETITIVE DISPLACEMENT

No incumbent vendor identified. First-call priority is identifying the current camera/VMS and access control vendor at the existing Atlanta campus. If Genetec, emphasize that Genetec Federation across the new South Fulton campus requires a server at each site, while Verkada Command federates natively with no per-site server. If Avigilon/Motorola, compare ACC server rack costs and per-camera licensing vs. Verkada's zero-appliance model. If Honeywell or a legacy access control vendor, emphasize that changes require integrator truck rolls, while Verkada access policy changes are self-serve in Command. For the South Fulton greenfield, the strongest angle is that traditional VMS vendors require the hospital to buy, rack, and maintain dedicated servers at the new campus. Verkada eliminates that entirely.

Verkada holds OMNIA contract R250206 alongside Genetec (R250204). Grady can compare both on the same cooperative purchasing vehicle

HGACBuy contract SE05-26 includes Avigilon/Alta, Axis, Genetec, Hanwha, Honeywell, Milestone as competitor manufacturers. Verkada is listed alongside all major incumbents

Verkada's zero-appliance architecture eliminates NVR servers at each campus, directly relevant for Grady's two-campus future

PRIMARY BUNDLE (3)

AD15 Card Reader

ACCESS CONTROL Access Control**AD15 Card Reader***Modern credentials, one reader*

- Supports mobile, card, and fob credentials
- Bluetooth Low Energy for mobile unlock
- Multi-technology (13.56 MHz, 125 kHz)
- Sleek wall-mount design

WHY THIS PRODUCT

Grady has experienced both a ransomware attack (affecting payroll) and a data breach exposing approximately 900 patients

Deployment across Large urban safety-net hospital system; anchor facility is Grady Memorial Hospital in Atlanta, GA; \$1B South Fulton campus expansion underway with 200-bed acute care hospital (2031), medical office building (2028), and freestanding ED (June 2026); one of the largest urban safety-net providers in the United States per AHA

NDAA[🔗 Datasheet](#)

CD42 Dome Camera

CAMERAS D-Series**CD42 Dome Camera***Smart indoor surveillance, simplified*

- 5MP resolution, 30 fps
- Onboard people/vehicle detection
- Up to 365 days cloud-backed storage
- NDAA Section 889 compliant

WHY THIS PRODUCT

Grady is deploying a \$1B greenfield South Fulton campus across three phases (ED opening June 2026, medical office buildi

Deployment across Large urban safety-net hospital system; anchor facility is Grady Memorial Hospital in Atlanta, GA; \$1B South Fulton campus expansion underway with 200-bed acute care hospital (2031), medical office building (2028), and freestanding ED (June 2026); one of the largest urban safety-net providers in the United States per AHA

NDA

[Datasheet](#)

Verkada Command

SOFTWARE Platform

Verkada Command

One platform for all physical security

- Unified dashboard for cameras, access, alarms, sensors
- Browser and mobile app access
- Role-based access control
- REST API for integrations

WHY THIS PRODUCT

Grady is deploying a \$1B greenfield South Fulton campus across three phases (ED opening June 2026, medical office buildi

Deployment across Large urban safety-net hospital system; anchor facility is Grady Memorial Hospital in Atlanta, GA; \$1B South Fulton campus expansion underway with 200-bed acute care hospital (2031), medical office building (2028), and freestanding ED (June 2026); one of the largest urban safety-net providers in the United States per AHA

DISCOVERY QUESTIONS BY PERSONA (5)

● **It Director** 4 questions

When does the South Fulton freestanding ED come online? Are security infrastructure decisions for that site already locked in, or still in design?

Capital Project Signal

HIGH

high

New builds are a clean-sheet opportunity, is the security spec for the South Fulton campus being written by facilities, IT, or an integrator?

Capital Project Signal

HIGH

high

I noticed Grady experienced both a ransomware attack and a patient data breach affecting approximately 900 individuals. Does your current security infrastructure produce the audit trail and footage retention that HIPAA compliance needs?

Regulatory Compliance Expansion

MEDIUM

high

Are you standardizing the new South Fulton site on the same security platform as the existing Atlanta campus, or evaluating fresh?

Capital Project Signal

HIGH

medium

● **Director Of Facilities** 1 question

When does the South Fulton freestanding ED come online? Are security infrastructure decisions for that site already locked in, or still in design?

Capital Project Signal

high

Who is the incoming CEO at Grady Health System, and when do they formally take over from Hauptert? The incoming CEO will own the South Fulton security infrastructure spec and legacy campus modernization decisions.

Search AJC, Becker's Hospital Review, and Grady Health press releases for CEO succession announcement. LinkedIn search for 'CEO Grady Health System 2026.' This is the #1 missing piece for deal strategy.

high

Who is Grady's Director of Security or VP of Safety? No physical security leadership names were captured from any source, the security team appears to be managed via contract security firms (Allied Universal, Securitas) or internal roles not publicly posted.

Direct discovery question on first call: 'Who owns physical security operations at Grady, is that an internal team or a managed security contract?' Alternatively, LinkedIn search for 'Director of Security Grady Health' or 'VP Safety Grady Health System Atlanta.'

high

What physical security vendor(s) currently operate at the main Grady Memorial campus at 80 Jesse Hill Jr Dr SE? Zero vendor-branded signals (subdomains, job postings, tech stack mentions) across all sources, incumbent vendor is unknown.

Discovery question to IT or facilities: 'Who is your current camera and access control vendor at the main campus?' Alternatively, IPVM community forums, local integrator relationships (Convergint Atlanta, Pavion Atlanta), or Georgia state procurement records.

high

Has the security specification for the South Fulton freestanding ED (opening June 2026) already been written and awarded, or is it still open? The ED opening date is imminent, if the spec is already locked, the first engagement window is the medical office building (2028).

Call to Grady facilities or the ED general contractor. ConstructConnect may have the GC listed on the South Fulton project. Georgia state procurement records for Union City, Fulton County.

medium

Is Grady Health System classified as a public entity (Fulton County authority) in a way that qualifies them to use Sourcewell, OMNIA Partners, or HGACBuy cooperative purchasing without additional approvals?

Grady is operated by the Grady Memorial Hospital Corporation, a public authority under Fulton County. Georgia public authorities can typically access cooperative purchasing vehicles. Confirm with Grady's procurement team: 'Does your procurement policy allow use of OMNIA Partners or HGACBuy cooperative contracts?'

Did Grady's post-incident review following the April 2026 shootings (Hudson homicide and on-campus mass shooting) drive any formal security infrastructure assessment or budget request? This would be the strongest near-term buying signal.

Discovery question to security or facilities leadership: 'After the incidents
