

HOME DEPOT, INC.

Retail · GA · NYSE: HD

TL;DR — 30-SECOND SKIM MEDIUM

Home Depot operates 2,359 retail stores plus 790+ distribution/branch locations and is adding 12 new stores across 8 states by end of 2026, plus ~150 new distribution facilities from a \$1.2B supply chain investment. Each new facility is a greenfield physical security decision waiting to be made.

Two simultaneous Asset Protection Specialist postings (Hyattsville MD + Rosenberg TX) referencing CCTV review and physical security monitoring, plus a Manager of Security Operations hire in Houston reporting to a Director of Corporate Security, signal active AP infrastructure investment. Zero incumbent vendor names surfaced across the entire OSINT footprint.

Security guard shootings at stores in San Carlos CA and South Los Angeles (one fatality) within the past 12 months put ORC-related store violence on the board agenda. This is the most direct opening for a conversation about real-time alerting, remote LP investigation, and safer transaction zone coverage.

PROJECTED CHAMPION CANDIDATES (3)

These are projections based on public signals about each candidate. Validate via discovery.

Angie Brown — Executive Vice President and Chief Information Officer

Champion

HIGH

62%

Role Recency Arc Voice Topic Auth

Brown holds the EVP/CIO title at Home Depot, which maps directly to IT Director/champion in the persona rule engine - she owns technology strategy, infrastructure, and cybersecurity across 2,350 stores, 790+ branches, and all supply chain facilities. She was appointed in May 2025, making her a recent hire whose first 12 months typically include an audit of existing vendor relationships including physical security infrastructure. Her 27-year Home Depot tenure means she knows where legacy systems are buried, but the CIO title elevation signals a mandate to modernize.

Validate: Since taking the CIO role last May, has Angie Brown initiated a review of physical security infrastructure - cameras, access control, or the platforms managing them - as part of the broader technology strategy she owns?

2025-05-29 — Named EVP and Chief Information Officer, responsible for technology strategy, infrastructure, cybersecurity, and software development across all Home Depot locations.

Warm intro: Home Depot HQ is in Smyrna, GA (Cobb County). Andy's geographic focus includes Atlanta and Southeast US, and Home Depot is a major Atlanta-area employer with a strong presence in the local tech community. Check Atlanta DNB network for any Home Depot IT connections.

LinkedIn Search PRIMARY

Christopher Lanzilotta — Chief Information Security Officer

Economic Buyer

MEDIUM

38%

Role Recency Arc Voice Topic Auth

Lanzilotta's CISO title maps to economic buyer in the persona - he controls security budget and owns risk posture, but CISOs at retailers typically focus on cyber/information security rather than physical security camera infrastructure. His score is capped because the CISO role at a retailer of this size usually does not own physical security budgets directly; that tends to sit with a VP of Asset Protection or Director of Corporate Security. The weak source quality (third-party recruiter profile only) means his current status is unconfirmed.

Validate: Does Christopher Lanzilotta's CISO scope at Home Depot include physical security infrastructure like cameras and access control, or does that sit with a separate Corporate Security or Asset Protection leader?

Warm intro: Andy's background at Check Point Software and EY may overlap with Lanzilotta's network given the CISO community in Atlanta. Check Point is a common cybersecurity vendor at large retailers - worth checking if there is a shared connection through the Check Point partner or customer ecosystem.

LinkedIn Search WEAK

Unknown Director of Corporate Security — Director, Corporate Security (inferred from Manager, Security Operations job description)

Champion

INFERENCE

70%

Role Recency Arc Voice Topic Auth

The Manager, Security Operations posting in Houston explicitly states the role reports to a Sr. Manager or Director of Corporate Security. This means a Director-level physical security leader exists within Home Depot's Corporate Security Department and is the most likely champion for a Verkada conversation. This person owns Non-Product Facility Security, Investigations, and oversees the team that reviews CCTV and manages physical security across the store network. They are unnamed in all available sources.

Validate: *The Manager, Security Operations role in Houston reports to a Director of Corporate Security - can you confirm who holds that Director role and whether physical security infrastructure decisions (cameras, access control) sit within their scope?*

MEDDIC QUALIFICATION

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
M Metrics	Consolidate physical security across 2,359 retail stores plus 790+ distribution/branch locations onto a single cloud-managed platform. Eliminate per-site NVR/DVR infrastructure and reduce LP investigation time by enabling remote footage review. Protect against ORC-driven shrink across high-traffic retail footprint. Standardize security for ~150 new distribution facilities and 80 new stores in the current five-year expansion plan. 10-K confirms 2,359 stores, 790+ distribution/branch locations, 472,400 employees (SEC filing FY ending 2026-02-01) 10-K confirms ~80-store five-year expansion plan and \$1.2B supply chain investment targeting ~150 new distribution facilities Vertical match confirms ORC, shrink, and safe_transaction_zones as key drivers Asset Protection Specialist postings explicitly reference CCTV review and physical security monitoring as core duties Security guard shooting incidents at San Carlos, CA and South Los Angeles reflect ORC and store-level violence exposure	☐ "Across 2,359 stores, how many cameras is your LP team responsible for today, and how many of those feed into NVRs that require on-site access to review footage?" <i>Quantifying camera count and NVR dependency establishes the scale of the modernization opportunity and the cost of the status quo.</i> champion high ☐ "What's the current annual spend on physical security infrastructure across stores and distribution centers, including hardware maintenance, NVR replacements, and integrator service calls?" <i>Establishing a TCO baseline lets us frame Verkada as a cost-reduction play, not just a feature upgrade.</i> economic buyer high ☐ "Has ORC-driven shrink been trending up or down over the past two fiscal years, and is that trend influencing LP technology investment decisions?"	HIGH PRIMARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
		Connecting shrink trends to technology investment validates urgency and budget allocation. champion medium	

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
E Economic Buyer	Likely VP/SVP of Asset Protection or VP of Corporate Security. No named individual identified in available data. Angie Brown (EVP & CIO) owns technology infrastructure including store systems and may co-own or influence physical security platform decisions, especially if physical security is converging under IT. Angie Brown confirmed as EVP and CIO responsible for 'technology strategy, infrastructure, cybersecurity, and software development across 2,350 retail stores, 790+ branches, supply chain facilities' (Home Depot press release, 2025-05-29) Manager, Security Operations posting reports to 'Sr. Manager or Director Corporate Security,' confirming a Corporate Security hierarchy exists but no named VP/SVP surfaced returned insufficient_data for named individuals beyond company-bg sources	☐ "Does physical security infrastructure (cameras, access control, NVRs) fall under IT's budget, or does Asset Protection or Corporate Security own that spend independently?" Identifying budget ownership determines who the economic buyer is and which executive to engage. championhigh ☐ "Who at the VP or SVP level is responsible for approving physical security platform changes across the store fleet?" Naming the economic buyer is critical for deal progression. Without this, we cannot map the approval chain. championhigh ☐ "With Angie Brown recently stepping into the CIO role, has there been any re-evaluation of which technology categories fall under her organization versus Corporate Security?" A new CIO often triggers organizational boundary changes. If physical security is moving under IT, Brown	INFERENCE SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
		<i>becomes the economic buyer.</i> influencer medium	

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
D Decision Criteria	Expected evaluation criteria: (1) multi-site scalability across 3,000+ locations, (2) remote footage access for LP investigators without on-site NVR dependency, (3) ORC investigation speed and forensic search, (4) zero-appliance architecture to avoid NVR maintenance at every store, (5) integration with existing LP workflows (exception-based reporting, POS-area awareness), (6) enterprise-grade reliability at Home Depot's scale. Vertical match confirms ORC, shrink, safe_transaction_zones as key drivers Typical pain includes 'high_camera_count_low_usability,' 'LP_team_cant_review_footage_remotely,' 'inconsistent_systems_across_stores' Asset Protection Specialist postings reference CCTV review and physical security monitoring as daily tasks 10-K confirms massive footprint: 2,359 stores + 790+ distribution/branch locations	☐ "When your LP team evaluates security camera platforms, what are the top three criteria they score on? Is remote footage access near the top, or is it more about camera resolution and coverage?" <i>Understanding decision criteria hierarchy lets us lead with the capabilities that matter most.</i> championhigh ☐ "Is cloud-managed security infrastructure something your IT and security teams view as a positive, or does storing video in the cloud raise concerns internally?" <i>Cloud acceptance vs. resistance is the single biggest deal-shaping factor for Verkada at enterprise scale.</i> influencerhigh ☐ "Does your current LP workflow require POS transaction data correlated with video, or is that a nice-to-have?" <i>POS integration is a common decision criterion in retail. If it's a hard requirement, it shapes the demo and POC scope.</i>	MEDIUM SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
		champion medium	

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
D Decision Process	Home Depot is a Fortune 50 public corporation. Physical security platform decisions at this scale will involve procurement, IT (CIO Angie Brown's org), Corporate Security leadership, and likely CFO-level approval for enterprise-wide contracts. Procurement path is direct purchase or commercial reseller, not cooperative purchasing. Given the 3,000+ location footprint, expect a phased evaluation: pilot region, then regional rollout, then enterprise standardization. Entity type: public_corporation (SEC 10-K) Angie Brown confirmed as EVP & CIO with infrastructure mandate across all stores, branches, and supply chain (press release 2025-05-29) Manager, Security Operations posting confirms structured Corporate Security department with defined reporting chain Fortune 50 scale (472,400 employees, \$157B+ revenue) implies formal procurement process	☐ "For a technology platform that would touch every store location, what does the evaluation and approval process look like? Is it a formal RFP, or can a successful regional pilot lead to an enterprise contract?" <i>Understanding the procurement path determines deal timeline and resource allocation.</i> championhigh ☐ "How many stakeholders need to sign off on a physical security platform change? Are IT, Corporate Security, and Asset Protection all at the table, or does one group own the decision?" <i>Mapping the approval chain prevents surprises late in the deal cycle.</i> championhigh ☐ "Has Home Depot ever run a regional pilot for a physical security technology before scaling it enterprise-wide? What did that process look like?" <i>If there is precedent for a pilot-to-contract path, it dramatically shortens the sales cycle compared to a full enterprise RFP.</i>	INFERENCE SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
		influencer medium *****	

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
I Identify Pain	LP teams at 2,359 stores are reviewing CCTV footage and monitoring physical security as a daily responsibility, but likely depend on per-store NVR/DVR infrastructure that requires on-site access. At this scale, inconsistent systems across stores create investigation friction, and LP investigators cannot review footage remotely without VPN or physical presence. ORC incidents, including two security guard shooting incidents at store locations, highlight the operational risk of the current security posture. Asset Protection Specialist postings explicitly state: 'reviewing CCTV and exception reports, monitoring the store's physical security' Vertical typical_pain includes 'LP_team_cant_review_footage_remotely' and 'inconsistent_systems_across_stores' Security guard shooting incidents at San Carlos, CA and South Los Angeles reflect ORC and store-level violence exposure 2,359 stores with high camera counts but low usability is a matched pain pattern	☐ "When an ORC incident happens at a store in San Carlos, how does your regional LP team access that footage? Do they have to call the store, or can they pull it up remotely?" <i>This question directly probes the remote access gap. If the answer is 'call the store' or 'VPN into the NVR,' the pain is confirmed.</i> championhigh ☐ "After the security guard incidents in California and Los Angeles, what came out of the post-incident review as the primary gap: detection, response time, or footage retrieval for investigation?" <i>Tying a known incident to a specific infrastructure gap creates urgency and emotional resonance.</i> championhigh ☐ "Are all 2,359 stores running the same camera and NVR platform, or have acquisitions and store-level decisions created a patchwork of systems?" <i>Inconsistency across stores is a Verkada sweet spot. If</i>	HIGH PRIMARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
		<i>confirmed, it validates the standardization value proposition.</i> influencer medium	

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
C Champion	No named champion candidate identified with sufficient confidence. The strongest structural fit is the Director or VP of Corporate Security (referenced in the Manager, Security Operations posting as the reporting chain) or the VP/SVP of Asset Protection. Angie Brown (EVP & CIO) is a potential champion if physical security platforms fall under IT, but her primary mandate is broader technology strategy. Christopher Lanzilotta (CISO, per third-party source) could be relevant if cyber-physical convergence is a priority, but his current status at Home Depot is unconfirmed. Manager, Security Operations posting reports to 'Sr. Manager or Director Corporate Security,' confirming a Corporate Security leadership chain exists Angie Brown confirmed as EVP & CIO with infrastructure mandate (press release 2025-05-29), but physical security platform ownership is unconfirmed Christopher Lanzilotta listed as CISO on Fortify Experts (weak source, medium confidence), no corroborating Home Depot press release returned insufficient_data for named individuals	☐ "Who leads Corporate Security at the VP or Director level? The Security Operations Manager role in Houston reports up to that function, and that's likely the person who owns camera and access control platform decisions." <i>Identifying the champion by name is the single most important gap to close. Without a named champion, there is no deal.</i> champion high ☐ "Is Asset Protection (LP) and Corporate Security the same organization at Home Depot, or are they separate functions with separate leadership?" <i>Understanding the org structure determines whether there is one champion or two stakeholders to align.</i> influencer high ☐ "Has Angie Brown's CIO organization started to pull physical security infrastructure under IT, or does that remain with Corporate Security?" <i>If Brown's org is absorbing physical</i>	INFERENCE WEAK

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
		<i>security, she or a direct report becomes the champion. This changes the engagement strategy entirely.</i> influencer medium	

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
C Competition	No specific incumbent vendor identified from available research. Asset Protection Specialist postings reference 'CCTV' and 'Electronic Article Surveillance' generically but do not name a platform or vendor. At Home Depot's scale (2,359 stores), the incumbent is almost certainly an enterprise VMS/NVR platform (likely Avigilon, Genetec, Milestone, or March Networks given the retail vertical) with per-store NVR infrastructure. Asset Protection Specialist postings mention 'CCTV' and 'exception reports' without naming a vendor No vendor names detected in tech_stack_mentions (empty array) Retail vertical displacement targets in persona file include Avigilon, Genetec, Milestone, and March Networks Certificate transparency and GitHub data did not surface physical security vendor indicators	☐ "What camera and VMS platform are your stores running today? Is it the same across all 2,359 locations, or did different regions standardize on different vendors?" Identifying the incumbent is prerequisite to building a competitive displacement strategy and TCO comparison. champion high ☐ "When was the last time Home Depot did a full evaluation of physical security platforms? Was it a recent decision, or has the current system been in place for 5+ years?" A legacy platform installed 5+ years ago is approaching refresh. A recent decision means displacement timeline is longer. influencer high ☐ "Are you using a different vendor for distribution center and warehouse security than for retail stores, or is it standardized?" The SRS Distribution acquisition added hundreds of locations that may run a completely different security stack, creating	INFERENCE WEAK

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
		<i>a standardization opportunity.</i> champion medium

INCIDENT HISTORY

TOTAL BREACHES

INDIVIDUALS AFFECTED

0

SOURCE

COOPERATIVE PURCHASING

No cooperative purchasing data (Sourcewell, TIPS, OMNIA, HGACBuy, COSTARS) was provided for this account. Verkada holds verified contracts on Sourcewell (041524-VRK), OMNIA Partners (R250206), and HGACBuy (SE05-26). For a retailer of this size, cooperative purchasing is not the primary procurement path - Home Depot's security infrastructure decisions at enterprise scale typically go through direct procurement, national contracts, or integrator relationships. Sourcewell and OMNIA contracts are more relevant if Home Depot is evaluating Verkada for distribution/branch facilities in jurisdictions where cooperative purchasing is available. Confirm Home Depot's procurement vehicle preference early in discovery.

DISPLACEMENT INTEL

VENDOR ABSENCE FINDING

tech-and-pain output was truncated due to a parse error. No displacement vendor absence finding was recovered. Vendor identification requires direct discovery.

HIRING SIGNALS

INTENSITY **STEADY** 50 postings captured **MEDIUM**

50 postings captured via SerpAPI Google Jobs represents a small fraction of Home Depot's actual open positions. Home Depot operates 2,300+ stores in the US and routinely carries thousands of open store-level positions. The 50-posting sample is directional only. The careers.homedepot.com portal and internal mobility channels carry the bulk of volume. Do not extrapolate hiring velocity from this sample.

GEOGRAPHIC SIGNALS (5)

Houston, TX

5 roles · Existing hub. Houston postings include Manager, Security Operations (corporate security role), Lot Associate, MERCHANDISING (2 postings), and Kitchen Designer. The security operations manager role is a corporate-level position reporting to Sr. Manager or Director Corporate Security, suggesting Houston hosts a regional corporate security hub. The mix of frontline store roles alongside a corporate security manager posting indicates Houston is an established operational center, not a new-market signal.

Maryland (multiple)

8 roles · Existing hub. Eight postings span Hyattsville, Bowie, Laurel, Aspen Hill, Oxon Hill, Waldorf, and one state-level warehouse posting (Sparrows Point). Role mix includes Asset Protection Specialist (Hyattsville), Sales Specialists, Lot Associate, Department Supervisor, Repair and Tool Technicians, and Warehouse Associate. High density of postings across the DC metro corridor indicates multiple established store locations, not expansion.

Wisconsin (multiple)

10 roles · Existing hub. Ten postings span Racine, Franklin, West Allis, Waukesha, Milwaukee, and Delafield. Roles are entirely frontline and operational. No security or leadership roles. Consistent with normal store-level staffing across an established Wisconsin footprint.

Texas (non-Houston)

7 roles · Existing hub. Postings in Katy, Rosenberg, Missouri City, and Spring. Distribution of frontline and supervisor-track roles across Southwest Houston suburbs indicates a dense existing store network in the greater Houston metro, not new-market entry.

California (Central Valley)

5 roles · Existing hub. Postings in Porterville, Visalia, and Fresno. All frontline and operational roles. No security or leadership roles posted in this cluster.

LAND PLAY

Lead with Cameras into a cluster of new-build or recently acquired distribution/branch locations. The SRS Distribution acquisition (including the GMS acquisition adding hundreds of specialty distribution locations) and the four new professional distribution centers (Detroit, Los Angeles, San Antonio, Toronto) represent clean-sheet sites where security infrastructure decisions may not yet be locked in. Avoid leading with a retrofit of existing 2,359-store fleet initially. New builds and acquisitions are lower-friction entry points at an account this large.

Target Sites: Four new professional distribution centers (Detroit, LA, San Antonio, Toronto); recently acquired GMS distribution locations; Cobb County HQ expansion (2455/2410 Paces Ferry Road, Smyrna, GA). HQ expansion is geographically close to Andy's Atlanta focus.

Scope: POC: 1-2 new distribution centers or the HQ expansion site. Initial land could be 50-200 cameras per site depending on facility size.

Expansion: standardize across all new SRS/GMS distribution locations before approaching the retail store fleet.

POC STRATEGY

Design the POC around a new professional distribution center or the Cobb County HQ expansion. For a distribution center, demonstrate perimeter security (license plate recognition for fleet vehicles), interior warehouse coverage, and cloud-managed remote access for Corporate Security. For HQ, demonstrate visitor management (Guest), access control for the new daycare facility expansion, and executive protection camera coverage. In both cases, the zero-appliance architecture is the key differentiator: no NVR to rack, no server room to build.

Cameras (edge analytics, remote footage access, forensic search)

Access Control (badge management for new facilities)

Guest (visitor management for HQ expansion)

Command platform (single-pane-of-glass across distribution sites)

CHANNEL PARTNER

Home Depot will likely require a commercial reseller or direct engagement for an account of this size. Given the Georgia HQ, identify a Southeast-based enterprise integrator with Verkada certification who can handle the HQ expansion POC. For distribution center deployments across Detroit, LA, San Antonio, and Toronto, a national integrator with multi-market presence is needed. Andy's Atlanta geographic focus aligns well with the Cobb County HQ expansion as the initial engagement site.

BUNDLE RECOMMENDATION

Cameras **Access Control** + Guest
+ Sensors + Intercoms

Cameras are the entry point for any retail/distribution account: LP investigation, ORC prevention, and remote footage access are the acute pain. Access Control is the natural second product for new distribution facilities (badge management, zone control for warehouse areas). Guest is relevant for the HQ expansion (daycare facility, corporate visitor management). Sensors (environmental monitoring) apply to distribution warehouses. Intercoms could serve distribution center entry points and loading docks.

Headquarters in Smyrna, GA (Cobb County), within Andy's Atlanta territory focus

Distribution center expansion spans Detroit, LA, San Antonio, Toronto, requiring national integrator capability

Commercial account: cooperative purchasing is not the primary procurement path

PROCUREMENT PATH

Direct purchase via Verkada AE or commercial reseller. Home Depot is a Fortune 50 commercial corporation. Standard enterprise procurement process with direct contract negotiation.

Alt: If Home Depot's procurement team accepts cooperative purchasing for speed, Sourcewell contract 041524-VRK and OMNIA Partners contract R250206 are available as alternatives to bypass a full RFP cycle

EXPANSION MOTION

P1 POC at 1-2 new-build sites: Cobb County HQ expansion or one of the four new professional distribution centers. 50-200 cameras, access control for entry points. Goal: prove zero-appliance deployment speed and remote access for Corporate Security.

P2 Standardize across all new SRS Distribution and GMS acquisition locations (hundreds of sites). Position Verkada as the default security platform for all new builds and acquisitions. This avoids the political complexity of ripping out incumbent systems at existing stores.

P3 Retrofit existing retail store fleet. Start with a regional cluster (e.g., Southeast stores near HQ) and expand nationally. At 2,359 stores, this is a multi-year, multi-million-dollar enterprise rollout. Frame as NVR end-of-life replacement: as existing NVRs age out, replace with Verkada cameras with on-board storage.

Expand ratio: analysis phase (POC): ~200 cameras. analysis phase (new builds/acquisitions): potentially 5,000-10,000+ cameras across hundreds of distribution sites. analysis phase (full fleet): could be 50,000+ cameras across 2,359 stores. Land-to-expand ratio of 1:250+ is realistic.

COMPETITIVE DISPLACEMENT

Target: Unknown. Incumbent VMS/NVR vendor not identified. Most likely Avigilon, Genetec, Milestone, or March Networks based on retail vertical patterns.

Without confirming the incumbent, lead with architecture-level differentiation: zero-appliance (no NVR per store), cloud-managed remote access (no VPN required), and automatic firmware updates (no truck rolls to 2,359 stores for patching). If the incumbent is Avigilon, emphasize ACC software complexity and server hardware refresh cycles vs. zero-appliance Verkada. If Genetec, emphasize Federation complexity at scale vs. Verkada Command's native multi-site management. If March Networks, emphasize stagnating AI analytics vs. Verkada's edge AI (people, vehicle, license plate detection). First discovery call must identify the incumbent.

Retail vertical reference: Hot Topic, Salt & Straw, multi-unit retail deployments with cloud LP access

Zero-appliance architecture eliminates NVR maintenance across 2,359+ sites

Edge analytics (people detection, vehicle detection, license plate recognition) without GPU servers

BR33 Alarm Panel

ALARMS

BR-Series

BR33 Alarm Panel

Cloud-managed intrusion detection

- Supports up to 80 wireless sensors
- Cellular backup connectivity
- Integrated with Command platform
- Real-time alerts with video verification

WHY THIS PRODUCT

Matches Retail vertical requirements

Deployment across 2,359 retail stores plus 790+ distribution/branch locations; 472,400 employees (89.4% U.S.); world's largest home improvement specialty retailer

Retail deployments typically include: access control, alarms (BR-Series), cameras (D-Series)

DISCOVERY QUESTIONS BY PERSONA (7)

● **It Director** 4 questions

I see Home Depot is investing heavily in cloud, with production GCP deployments across pricing, personalization, checkout, and catalog workloads, plus enterprise-scale Kubernetes and Spinnaker CI/CD. Has physical security been included in that cloud-first conversation, or is it still the last on-prem holdout?

Cloud Transformation Initiative

HIGH

high

If IT is decommissioning on-prem servers for everything else, how do they feel about maintaining NVR servers just for cameras?

Cloud Transformation Initiative

HIGH

high

Home Depot operates 2,359 stores plus 790+ distribution and branch locations. Are those running the same security platform, or did each site choose its own over the years?

Multi Site Sprawl

HIGH

medium

When there's an incident at a remote distribution site, can your security team pull footage without calling someone on-site or VPN-ing into a local NVR?

Multi Site Sprawl

● **Director Of Facilities** 3 questions

When does the Cobb County headquarters expansion come online? Are security infrastructure decisions for that site already locked in, or still in design?

Capital Project Signal

HIGH

high

The four new professional distribution centers in Detroit, Los Angeles, San Antonio, and Toronto are clean-sheet builds. Is the security spec being written by facilities, IT, or an integrator?

Capital Project Signal

HIGH

high

With ~150 new distribution facilities planned as part of the \$1.2 billion supply chain investment, are you standardizing the new sites on the same security platform as existing locations, or evaluating fresh?

Capital Project Signal

OPEN QUESTIONS

high

Who is Home Depot's Director of Corporate Security (or equivalent title)? The Manager, Security Operations posting confirms this role exists and owns physical security operations, but no name appears in any public source.

LinkedIn search for 'Director Corporate Security Home Depot' or 'VP Asset Protection Home Depot'. Also check GSX (ASIS conference) attendee lists and speaker bios where Home Depot security leaders sometimes appear.

high

Who is Home Depot's incumbent physical security vendor for cameras and VMS? Zero vendor names (Avigilon, Genetec, Milestone, Lenel, Hikvision, Dahua, Brivo, March Networks) surfaced in OSINT.

Direct discovery question to the Corporate Security Director: 'Who provides your camera and VMS platform today?' Alternatively, check IPVM forum threads, Integrator references, or state/county procurement records for Home Depot security contracts.

high

Is physical security at Home Depot centrally managed from a corporate SOC, or does each store/region manage its own cameras independently?

Discovery question to the CIO or Corporate Security Director about whether loss prevention can pull footage remotely from any store without calling the store. The AP Specialist job description references in-store CCTV review, suggesting store-level management, but this is not confirmed at the enterprise level.

medium

What is the status of Angie Brown's infrastructure modernization agenda? She was appointed CIO in May 2025 with a mandate covering all physical locations, but there is no public detail on whether physical security infrastructure is within scope of her roadmap.

News search for Brown's public statements or conference appearances since May 2025. NRF (National Retail Federation) and RSA conference speaker lists are good secondary sources.

medium

Is Christopher Lanzilotta confirmed as current CISO, or has Steve Adegbite's tenure continued? Two separate sources point to different names for the same role with no clear resolution.

LinkedIn profile verification for both names. Home Depot IR page does not list CISO. A current press release or SEC filing with officer lists would resolve this definitively.

medium

What is Home Depot's physical security specification for the ~150 new distribution facilities planned under the \$1.2B supply chain investment? Greenfield builds are the lowest-friction Verkada entry point.

Discovery question to facilities or corporate security: 'Are security specifications for new distribution centers being standardized, or does each facility choose its own?' Also check if Home Depot publishes facility design standards through its integrator/contractor procurement portal.

medium

How have the security guard shooting incidents (San Carlos CA and South Los Angeles) affected Home Depot's corporate security investment posture? These are the strongest incident-based

triggers for a physical security conversation.

Discovery question to Corporate Security Director: 'After the incidents in California, did leadership set any remediation timeline around detection, response time, or coverage gaps at high-shrink stores?'

medium

Do the hundreds of SRS Distribution and GMS locations acquired in fiscal 2024-2026 run on a unified security platform, or are they fragmented across prior-owner systems?

Discovery question during initial call: 'When SRS acquired GMS, did the physical security systems get rationalized or are they still running on the prior platforms?' This is a multi-site sprawl displacement opportunity if fragmentation is confirmed.

low

Pain hypotheses and practitioner sentiment sections could not be fully populated because the tech-and-pain agent output was truncated. Full technical footprint data including displacement vendor hits and absence findings were not recovered.

Re-run tech-and-pain analysis step for home-depot slug to recover complete output, particularly displacement_vendor_hits, displacement_vendor_absence, pain_hypotheses, and practitioner_sentiment sections.
