

Walmart Inc.

Retail · AR · NYSE: WMT

TL;DR — 30-SECOND SKIM MEDIUM

Walmart operates 4,700+ U.S. stores and just completed a 350-acre, 12-building corporate campus in Bentonville, AR (opened January 2025), zero security vendor is mentioned across 8 facility opening articles, making the HQ campus a potential greenfield physical security deployment.

Walmart's 10-Q (Q3 FY2026) disclosed ~\$0.8B in higher self-insured general liability claims over 9 months, a documented parking lot shooting (Chicago, January 2023) that triggered legal questions about camera coverage adequacy, and an LPO pepper-sprayed in Gainesville FL with footage used only for post-incident ID, not real-time detection.

Zero physical security vendor fingerprints found across all OSINT sources (no subdomain data collected, no LP/security roles in 50 captured job postings, no vendor names in news or facility coverage), incumbent vendor identification requires direct discovery before any displacement conversation.

MEDDIC QUALIFICATION

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
M Metrics	Walmart operates 4,700+ U.S. stores, each requiring camera, access control, and alarm infrastructure. Consolidating onto a single cloud-managed platform eliminates per-site NVR/DVR servers across thousands of locations. Additionally, Walmart disclosed \$0.8B in higher self-insured general liability claims expense in 9 months (FY2026 10-Q), improved incident documentation and deterrence from upgraded physical security directly addresses that margin drag. The new 12-building, 350-acre Bentonville Home Office campus represents a standalone deployment opportunity. 6scan independent assessment references 4,700 U.S. stores in breach scenario modeling (6scan.com) Walmart 10-Q (period ending 2025-10-31): ~\$0.8B higher self-insured general liability claims expense, 22-26 bps margin drag (SEC filing) New 350-acre Home Office campus in Bentonville, AR, 12 buildings, opened January 2025 (corporate.walmart.com)	Actual camera count per store, current NVR/DVR infrastructure vendor, and total physical security spend are unknown. Discovery must quantify current IT labor and maintenance costs for security infrastructure across the store fleet.	MEDIUM PRIMARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
E Economic Buyer	Likely VP/SVP of Assets Protection or CSO-equivalent role. Walmart's Assets Protection division manages one of the largest retail LP operations in the U.S. The economic buyer for a deployment of this scale could also be a VP of Corporate Security or VP of IT Infrastructure, depending on whether budget sits in LP, corporate security, or IT. returned insufficient_data, no named individuals were captured Walmart is a public corporation (NYSE: WMT) in Retail vertical, persona maps CSO as economic buyer for this profile Hiring signals confirm Walmart's Assets Protection division exists (security_team_absence note references it by name)	No named economic buyer identified. Discovery must determine: (1) Does physical security budget sit under Assets Protection, Corporate Security, IT, or Facilities? (2) Who signs off on enterprise-wide security infrastructure decisions vs. store-level decisions? (3) Is there a centralized procurement function for physical security or is it regional?	INFERENCE WEAK

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
D Decision Criteria	Based on Walmart's Retail vertical match, decision criteria will center on: (1) shrink reduction and ORC countermeasures, (2) LP team ability to investigate remotely across 4,700+ stores without site visits, (3) scalability to thousands of locations without per-site server infrastructure, (4) self-insured liability claims reduction through better incident documentation and deterrence, (5) workforce safety for LP officers (documented pepper spray assault on LPO). Vertical match key_drivers_present: ORC, shrink, safe_transaction_zones (company-bg) Typical pain present: high_camera_count_low_usability, LP_team_cant_review_footage_remotely, inconsistent_systems_across_stores (company-bg) \$0.8B self-insured liability claims increase disclosed in 10-Q (SEC filing) Gainesville LPO pepper-sprayed during shoplifting response, workplace violence exposure for LP staff (newsfinale.com)	Unknown whether Walmart evaluates on NDAA compliance (not a federal entity, but could be a procurement preference). Unknown whether there is a formal security infrastructure scoring rubric or if decisions are made by committee. Must confirm whether total cost of ownership or upfront capex is the primary budget lens.	MEDIUM SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
D Decision Process	As a Fortune 1 public corporation, Walmart's procurement process for enterprise-wide physical security infrastructure will involve: (1) corporate procurement/sourcing team, (2) likely multi-stakeholder evaluation committee (Assets Protection, IT, Facilities, Finance), (3) pilot/POC at select stores before enterprise rollout, (4) board-level awareness for spend of this magnitude. Walmart Business is already an OMNIA Partners supplier (contract 15-02), indicating familiarity with cooperative purchasing vehicles. However, as a private-sector buyer, Walmart is more likely to run its own RFP than use a cooperative contract. Entity type: public_corporation, NYSE: WMT, large accelerated filer (company-bg) Walmart Business holds OMNIA contract 15-02 for 'Retail and Wholesale Merchandise Solutions'. Walmart is familiar with OMNIA as a supplier () New Home Office campus construction took 5+ years (2019-2025), indicates long capital project cycles (corporate.walmart.com)	Actual procurement process for physical security is unknown. Must discover: (1) Is there a centralized security procurement function or do regions/divisions buy independently? (2) What is the typical evaluation timeline? (3) Are there existing MSAs with security integrators like Convergent or Everon that would channel the deal?	INFERENCE SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
I Identify Pain	Walmart's LP team uses in-store cameras for after-the-fact investigation (confirmed by Gainesville incident footage), but a parking lot shooting in Chicago raised public legal questions about whether camera coverage and response infrastructure were adequate to prevent violent incidents, a gap common in legacy deployments with high camera counts but low usability. Across 4,700+ stores, the LP team cannot efficiently review footage remotely, and systems are likely inconsistent store-to-store. Meanwhile, \$0.8B in rising self-insured liability claims creates C-suite financial pressure to improve incident documentation and deterrence. Gainesville LPO incident: surveillance footage captured suspect at 7:26 p.m., used for post-incident ID by face and tattoos, confirms reactive, not proactive, camera use (newsfinale.com) Pullman Chicago parking lot shooting Jan 4, 2023: legal filing questioned 'what security measures Walmart had in place' in a district with 31% YoY shooting increase (mickelsendalton.com) Pain hypothesis: 'LP team relies on fixed in-store camera footage for after-the-fact investigation' with linked_persona_pain: high_camera_count_low_usability (tech-and-pain) 10-Q: \$0.8B higher self-insured general liability claims expense, 9 months ended Oct 31, 2025 (SEC filing)	No direct confirmation of current camera vendor, NVR age, or whether Walmart has already invested in cloud-managed or AI-enabled cameras. The \$0.8B claims increase is aggregate, unknown what portion is attributable to in-store physical security incidents vs. slip-and-fall or other categories.	MEDIUM SECONDARY

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
C Champion	No named champion identified. Leadership discovery returned insufficient_data. The ideal champion profile is a Director or VP of Assets Protection, Physical Security, or Security Technology, someone who owns day-to-day security operations, feels the pain of managing inconsistent systems across 4,700+ stores, and has budget influence but is not the final signoff. A secondary champion profile would be a Director of IT Infrastructure who is frustrated with maintaining NVR servers at store locations. status: insufficient_data, zero named individuals captured Hiring signals: zero security-specific roles in 50 captured postings (data artifact, not evidence of no hiring) Persona role_priority maps IT_Director at 1.0 and Director_of_Facilities at 0.85 for champion fit	Critical gap. Must identify named individuals in Assets Protection leadership, Corporate Security, and IT Infrastructure. LinkedIn research for 'Walmart VP Assets Protection,' 'Walmart Director Physical Security,' and 'Walmart Director Security Technology' is the immediate next step. This is the single most important discovery task before the first call.	INFERENCE WEAK

ELEMENT	ASSESSMENT	DISCOVERY QUESTIONS	CONFIDENCE
C Competition	No incumbent physical security vendor was identified in any data source. Zero displacement vendor fingerprints (Avigilon, Genetec, Milestone, Lenel, Hikvision, Dahua, March Networks, Brivo) were confirmed. SSL/subdomain data was not collected. However, HGACBuy contract SE05-26 lists Avigilon/Alta, Axis, Bosch, Genetec, Hanwha, Honeywell, Milestone, and Motorola as competitor manufacturers in the same video surveillance category where Verkada is listed, any of these could be the incumbent at Walmart stores. displacement_vendor_hits: empty array (tech-and-pain) displacement_vendor_absence: ' was not available for walmart, no subdomain data was collected' (tech-and-pain) HGACBuy SE05-26 competitor manufacturers: Avigilon/Alta, Axis, Bosch/Keenfinity, Genetec, Hanwha, Honeywell, Milestone, Motorola () No security vendor mentioned across 8 facility expansion articles covering Bentonville campus (tech-and-pain)	Incumbent vendor identification is completely unresolved. At 4,700+ stores, Walmart may use multiple vendors regionally or have a national MSA with one integrator. Discovery must ask directly: Who provides your cameras today? Who manages your VMS? Is access control unified with video? Is there an existing integrator relationship (Convergint, Everon, Stanley/Securitas)?	INFERENCE WEAK

RECENT MATERIAL EVENTS (7)

2025-01-12 Capital Project **Verkada-relevant** **HIGH** **SECONDARY**

Walmart completed its move to the new 350-acre Home Office campus in Bentonville, Arkansas, opening the final Upstream Building. The campus comprises 12 office buildings constructed from mass timber, the largest such application in the U.S., across approximately 897,500 sq ft in Zone 1 alone, with Mercer Mass Timber supplying 21,000 cubic meters of CLT and glulam. Civil engineering began in 2019. New security infrastructure decisions for this campus-scale deployment represent a material physical security opportunity.

2025-12-03 Regulatory Verkada-relevant HIGH PRIMARY

Walmart's 10-Q (period ending 2025-10-31) disclosed approximately \$0.8 billion in higher self-insured general liability claims expense during the nine months ended October 31, 2025, driven by rising costs to resolve claims across retail and related industries. This 22–26 basis point margin drag signals elevated physical liability exposure across Walmart's retail footprint, a financial pressure point that upgraded physical security (incident documentation, deterrence) can directly address.

Badge Access Not Unified With Video

INFERENCE

SECONDARY

Walmart's history of IT supply chain security failures, a 2015–2016 incident where Compucom help-desk contractors with privileged access were monitoring internal email, and a 2005–2006 breach where a generic VPN account from a departed Canadian employee went unsuspended and was used to exfiltrate POS source code, suggests an institutional pattern where third-party access and offboarding controls have historically lagged the scale of operations, a pattern that extends naturally to physical access credential management across thousands of locations.

2015–2016: FBI investigated Compucom employees assigned to Walmart's help desk who used access to monitor Walmart email accounts; Walmart terminated Compucom contract and 'put in place new tools to improve our monitoring process of IT contractors' (cshub.com)

2005–2006: Walmart breach traced to a generic VPN administrator account assigned to a departed Canadian employee that IT failed to deactivate; hackers exfiltrated POS source code undetected for months (wired.com, secpoint.com)

COOPERATIVE PURCHASING (4 VEHICLES)

Cooperative purchasing is unlikely to be Walmart's primary procurement path. Walmart is a private-sector retailer, not a public-sector entity, so OMNIA Partners, HGACBuy, Sourcewell, and COSTARS government cooperative contracts are not directly applicable to Walmart's store or corporate procurement. However, Walmart Business (Walmart's B2B division) holds its own OMNIA contract #15-02 ('Retail and Wholesale Merchandise Solutions and Services'), confirming Walmart participates in the cooperative purchasing ecosystem as a supplier, not a buyer through these vehicles. The HGACBuy SE05-26 competitive landscape is useful displacement intelligence: Avigilon/Alta, Axis, Genetec, HANWHA, Honeywell, Milestone, and Motorola Solutions are all on the same contract, indicating these are the vendors Walmart's physical security teams would encounter in any structured evaluation. If Walmart runs an RFP for physical security, expect these competitors to be shortlisted.

OMNIA Partners

PROCUREMENT PATH FLOWCHART

DISPLACEMENT INTEL

VENDOR ABSENCE FINDING

was not available for walmart, no subdomain data was collected. Zero displacement vendor fingerprints (Avigilon, Genetec, Milestone, Lenel, Hikvision, Dahua, March Networks, Brivo) can be confirmed or ruled out from current source data. Vendor identification requires direct discovery. GitHub org (github.com/walmart) has 0 public repos and provides no infrastructure signal. Physical security vendor identification for Walmart's ~4,700 U.S. stores will require direct qualification.

HIRING SIGNALS

INTENSITY **THIN** 50 postings captured **MEDIUM**

50 postings captured via SerpAPI Google Jobs represents a negligible fraction of Walmart's actual open requisitions. Walmart is the world's largest private employer with roughly 1.6 million US associates and likely thousands of open positions at any given time. The 50 captured postings are entirely retail front-line and warehouse operations roles (stockers, cashiers, cart attendants, pharmacy clerks, order fillers, sanitation workers, meat cutters). This sample reflects the algorithmic bias of Google Jobs surfacing high-volume hourly roles, not the full scope of Walmart's hiring. Physical security, loss prevention leadership, IT infrastructure, and corporate roles are almost certainly posted through Walmart's own careers portal (careers.walmart.com) and are not represented here. Patterns derived from this 50-posting sample are not reliable.

2 Sales Marketing	1 Operations Logistics	1 Facilities Maintenance	46 Other
----------------------	---------------------------	-----------------------------	-------------

TRIGGER EVIDENCE

insufficient_data. All 16 pre-computed trigger matches in were reviewed and validated against persona/verkada-se.yml persona signals. Every match is a non-matching results.

GEOGRAPHIC SIGNALS (3)

Las Vegas, NV

5 roles · Existing store operations hub, 5 postings across Walmart Supercenter #5070 (5200 S Fort Apache Rd) and Walmart Supercenter #2592 (1807 W Craig Rd, North Las Vegas). All roles are hourly retail operations (order filling, checkout, stocking, cart attendant, front end team member). This reflects steady-state hourly turnover hiring at existing Las Vegas metro supercenters, not geographic expansion or new-market entry.

Midlothian, VA

4 roles · Existing store operations hub, 4 postings at or near Midlothian, VA (Produce Service Representative, Stockroom Material Handler, Fleet Maintenance Assistant Manager in Brandermill/Midlothian, Online Order Filling). The Fleet Maintenance Assistant Manager role (\$80K–\$120K/yr) references Walmart's private fleet Transportation Service Shop, indicating an existing distribution/fleet maintenance facility in the Richmond metro area, not a new market.

Derby/Haysville/Rose Hill/Valley Center/Maize, KS

6 roles · Existing Wichita metro operations cluster, 6 postings spanning Derby KS, Haysville KS, Rose Hill KS, Valley Center KS, and Maize KS. All are hourly retail or Sam's Club operations roles. This is steady-state turnover hiring across existing Wichita-area supercenters and Sam's Club locations, not geographic expansion.

LAND PLAY

Lead with Cameras for LP use cases at a high-shrink store cluster or regional market, then expand to the new Bentonville Home Office campus as a parallel corporate-campus play. The LP pain is documented and quantifiable (\$0.8B in rising liability claims). Cameras with edge analytics (people detection, vehicle detection, license plate recognition) directly address ORC and shrink. Walmart's top vertical drivers.

Target Sites: Option A: High-shrink store cluster in a single metro (e.g., Chicago, where parking lot shooting was documented). Option B: New 350-acre Bentonville Home Office campus, 12 buildings, clean-sheet opportunity, no incumbent vendor publicly identified.

Scope: Store cluster: 5-10 stores, 50-100 cameras per store = 250-1,000 cameras. Bentonville campus: 12 buildings across 350 acres = likely 200-500 cameras + access control for all buildings.

POC STRATEGY

Propose a 30-day POC at 2-3 stores in a single metro market with the highest shrink or safety incident rates. Deploy Verkada cameras alongside existing infrastructure to demonstrate: (1) remote footage review by LP team without VPN or site visit, (2) AI-powered person/vehicle search reducing investigation time, (3) real-time alerts for door propping or after-hours motion in parking lots. Separately, pitch a campus POC for 1-2 buildings at the Bentonville Home Office.

Cameras, forensic video search (person of interest, vehicle, license plate)

Cameras, real-time alerts for after-hours motion, door propping

Command, multi-site dashboard showing all POC stores in one view

Access Control, for Bentonville campus buildings, integrated with video

CHANNEL PARTNER

Engage a national security integrator with existing Walmart relationships. Convergent and Everon both hold OMNIA 'Facility Technology Integration & Security System Services' contracts (R220702, R220701) and are likely candidates for Walmart's existing integrator relationships. Pavion and APIC are Verkada's listed dealers on HGACBuy contract SE05-26. For the Southeast region (Andy's focus), leverage Verkada's local channel presence in Arkansas given Walmart's Bentonville HQ.

Convergent holds OMNIA contract R220702 for Facility Technology Integration & Security System Services ()

Everon holds OMNIA contract R220701 for Facility Technology Integration & Security System

BUNDLE RECOMMENDATION

Cameras + Access Control + Alarms
+ Sensors

Cameras are the entry point. Walmart's LP pain is camera-centric (footage review, investigation speed, remote access). Access Control is the natural expansion for the Bentonville corporate campus and store back-of-house areas. Alarms add intrusion detection for after-hours store protection. Environmental Sensors address cold chain monitoring in pharmacy and grocery sections, creating a differentiated value-add beyond traditional security.

Services ()

Verkada listed on HGACBuy SE05-26 through dealers Pavion and APIC at 5% discount ()

Walmart HQ is in Bentonville, AR, within Andy's Southeast geographic focus (seller-profile.yml)

PROCUREMENT PATH

Direct enterprise procurement via Walmart's corporate sourcing team. Walmart is a private-sector buyer and will likely run its own evaluation process rather than use cooperative purchasing vehicles.

Alt: HGACBuy contract SE05-26. Verkada listed through Pavion and APIC at 5% discount, though this is primarily a public-sector vehicle

Alt: OMNIA contract R250206. Verkada holds 'Weapons and Threat Detection Equipment' contract, but this is a government-sector vehicle

Alt: Direct Verkada enterprise agreement with volume pricing for 4,700+ store deployment

EXPANSION MOTION

P1 POC at 2-3 stores in one metro + 1-2 buildings at Bentonville Home Office campus. Prove remote investigation speed, AI search, and multi-site Command dashboard value. 30-60 day timeline.

P2 Expand to full metro market (20-50 stores) + full Bentonville campus (12 buildings). Add Access Control at campus. Prove scalability and standardization across sites. 6-12 month timeline.

P3 National rollout across 4,700+ stores, phased by region or division. Add Alarms and Sensors for after-hours protection and environmental monitoring. 2-4 year timeline for full deployment.

Expand ratio: POC of ~500 cameras could expand to 200,000+ cameras across the full store fleet, a 400:1 expansion ratio.

COMPETITIVE DISPLACEMENT

Target: Unknown, no incumbent vendor identified. Most likely candidates based on Walmart's scale and the HGACBuy competitive landscape are Avigilon (Motorola), Axis, Genetec, Honeywell, or Milestone.

Without knowing the incumbent, lead with Verkada's zero-appliance advantage: no NVR servers to maintain at each of 4,700+ stores. If the incumbent is Avigilon/Motorola, emphasize elimination of ACC server infrastructure and per-camera licensing. Verkada Command is included. If

Genetec, highlight that Federation across 4,700 sites requires a server at each site, while Verkada Command federates natively. If Milestone, stress that Milestone sells software while the customer still buys servers, storage, and IT labor at every location.

Verkada zero-appliance architecture: no NVR/DVR, no on-prem servers, edge storage on cameras + cloud management

Verkada Command: single login for 4,700+ sites vs. per-site VMS servers

Automatic firmware updates pushed OTA, no truck rolls for patching across thousands of stores

AI analytics at the edge (people, vehicles, license plates) without GPU servers

PRIMARY BUNDLE (3)

CF82 Fisheye Camera

CAMERAS F-Series

CF82 Fisheye Camera

Full-room coverage, one camera

- 12MP sensor, 360-degree field of view
- Digital dewarping in Command
- Onboard people counting
- Indoor rated

WHY THIS PRODUCT

Walmart's Loss Prevention team relies on fixed in-store camera footage for after-the-fact investigation, as documented

Deployment across Large accelerated filer (NYSE: WMT); \$18.6B capex (9M FY2026); 4,700+ U.S. stores referenced in cybersecurity risk modeling; Delaware incorporation

NDAA

DISCOVERY QUESTIONS BY PERSONA (20)

● It Director 4 questions

Walmart operates 4,700+ U.S. stores. Are those running the same security platform, or did each store or region choose its own over the years?

Multi Site Sprawl

MEDIUM

6scan independent assessment references 4,700 U.S. stores in breach scenario modeling; vertical match confirms inconsistent_systems_across_stores as typical pain

When there's an incident at a remote store, can the LP or security team pull footage without calling someone on-site or VPN-ing into a local NVR?

Multi Site Sprawl

MEDIUM

Vertical match typical_pain_present: LP_team_cant_review_footage_remotely; Gainesville incident confirmed surveillance footage used for post-incident ID, indicating local camera review workflow

I see Walmart is investing in office consolidation, the new Bentonville campus, closing satellite offices, relocating staff. Has physical security been included in that consolidation conversation, or is it still the last on-prem holdout?

Vendor Consolidation Signal

MEDIUM

Walmart cut hundreds of jobs and consolidated offices nationwide to Bentonville and Hoboken; new 350-acre campus opened January 2025 (Yahoo Finance, corporate.walmart.com)

When you add up NVR licensing, maintenance contracts, and IT time across however many security vendors Walmart manages today, has anyone calculated the total cost of ownership?

Vendor Consolidation Signal

INFERENCE

Office consolidation pattern + 4,700+ stores signals vendor rationalization opportunity; no incumbent vendor identified. TCO comparison is unknown internally

● Director Of Facilities 4 questions

When does the Bentonville Home Office campus security buildout finalize? Are security infrastructure decisions for that site already locked in, or still in design?

Capital Project Signal

HIGH

Walmart completed 12-building, 350-acre New Home Office campus in Bentonville, AR, opened January 2025; no security vendor mentioned across 8 facility articles (corporate.walmart.com, Forbes, Construction Dive)

The new Bentonville campus is a clean-sheet opportunity, is the security spec being written by facilities, IT, or an integrator?

Capital Project Signal

HIGH

Ground-up construction began 2019; 12 uniquely designed office buildings with outdoor patios, fitness facilities, childcare; no security vendor publicly identified (corporate.walmart.com)

Are you standardizing the Bentonville campus on the same security platform as the stores, or evaluating fresh for corporate?

Capital Project Signal

INFERENCE

New campus vs. 4,700+ existing stores creates platform standardization question; no evidence of common security platform across both (company-bg, tech-and-pain)

Walmart operates 4,700+ stores. Are those running the same security platform, or did each site choose its own over the years?

Multi Site Sprawl

MEDIUM

4,700+ U.S. stores referenced in cybersecurity risk modeling; inconsistent_systems_across_stores flagged as typical pain for Retail vertical

● **Cso** 4 questions

I saw the parking lot shooting coverage from the Pullman Chicago Walmart in January 2023. How has that shifted security investment posture for parking lot and exterior coverage?

Incident Recent 12Mo MEDIUM

Pullman Walmart parking lot shooting Jan 4, 2023, 2 injured, 1 critical; legal filing questioned adequacy of Walmart security measures; District 05 shooting incidents rose 31% YoY (mickelsendalton.com)

After the Gainesville LP officer assault, did leadership set a timeline for LP safety remediation, better real-time alerting, body-worn cameras, panic buttons, or is it still in planning?

Incident Recent 12Mo MEDIUM

Gainesville LPO pepper-sprayed by shoplifter Nov 20; surveillance footage used post-incident for suspect ID; LPO required decontamination, workplace violence exposure documented (newsfinale.com)

Walmart's 10-Q disclosed roughly \$800 million in higher self-insured general liability claims expense over nine months. Has your risk management team quantified how upgraded physical security infrastructure, better incident documentation, faster evidence retrieval, real-time deterrence, could impact those claims costs?

Insurance Or Risk Pressure HIGH

Walmart 10-Q (period ending 2025-10-31): ~\$0.8B higher self-insured general liability claims expense, driven by rising costs to resolve claims across retail footprint (SEC filing, primary source)

Walmart's 10-K explicitly names active shooter situations in stores as an operational risk. What's the gap between what leadership wants to prevent and what the current security infrastructure can detect in real time?

Incident Recent 12Mo HIGH

FY2026 10-K lists active shooter situations in stores as named operational risk under 'Natural disasters, climate change, geopolitical events' (SEC filing)

● **Superintendent K12** 0 questions

No questions — persona not applicable to Retail vertical

● **Vp Of Operations** 4 questions

Walmart operates 4,700+ U.S. stores. Are those running the same security platform, or did each store or region end up on different systems over the years?

Multi Site Sprawl MEDIUM

4,700+ U.S. stores; inconsistent_systems_across_stores flagged as typical Retail vertical pain (company-bg)

Standardizing 4,700+ locations on one platform is a massive project. What would need to be true for that to land on next year's budget?

Multi Site Sprawl MEDIUM

Multi-site sprawl trigger fired with 4,700+ stores; \$18.6B capex (9M FY2026) suggests budget capacity exists for infrastructure investments of this scale (SEC filing)

If Walmart could manage video, access control, and environmental sensors from one login across all 4,700+ stores, what would that free up for your operations team?

Vendor Consolidation Signal

MEDIUM

Office consolidation nationwide (Yahoo Finance); no evidence of unified security platform across stores; Verkada single-platform positioning directly addresses this

The office consolidation, closing satellite offices, moving everyone to Bentonville and Hoboken, typically forces security infrastructure decisions at both the vacated and receiving sites. Where is Walmart in that process?

Vendor Consolidation Signal

MEDIUM

Walmart cut hundreds of corporate jobs, consolidated to Bentonville and Hoboken, Hoboken shedding ~100 roles by May 1 (Yahoo Finance, People Matters Global)

● Loss Prevention Director 4 questions

I saw the Gainesville incident where an LPO was pepper-sprayed during a shoplifting response, and the surveillance footage was key to identifying the suspect afterward. How long does it typically take your LP team to pull and review footage like that across different stores?

Incident Recent 12Mo

MEDIUM

Gainesville LPO incident: Walmart surveillance footage captured suspect entering at 7:26 p.m., identified by face and tattoos; LPO pepper-sprayed, required decontamination (newsfinale.com)

When there's an ORC incident or LP investigation at a store, can your team pull footage remotely, or does someone need to be physically on-site to access the NVR?

Multi Site Sprawl

MEDIUM

Vertical match typical_pain_present: LP_team_cant_review_footage_remotely; 4,700+ stores means physical site visits for footage review are not scalable

Across 4,700+ stores, are your cameras and video systems consistent, or did different stores or regions end up with different vendors and different interfaces over the years?

Multi Site Sprawl

MEDIUM

Vertical match typical_pain_present: inconsistent_systems_across_stores; 4,700+ U.S. stores (6scan.com breach assessment)

The Pullman Chicago parking lot shooting raised legal questions about what security measures Walmart had in place. After incidents like that, what was the primary gap your team identified, detection speed, camera coverage in exterior areas, or footage retrieval for evidence?

Incident Recent 12Mo

MEDIUM

Pullman Walmart parking lot shooting Jan 4, 2023, 2 injured, 1 critical; legal filing questioned adequacy of Walmart security measures; District 05 shooting incidents rose 31% YoY (mickelsendalton.com)

OPEN QUESTIONS

high

Who is Walmart's incumbent physical security vendor for its 4,700+ U.S. stores? Zero vendor-branded subdomains, no vendor names in 8 facility opening articles, and no security vendor mentioned in any of 50 captured job postings.

Direct discovery question to VP of Assets Protection or Director of Physical Security: 'What VMS and camera platform does Walmart run today across stores?' Alternatively: check IPVM forum discussions, integrator partner announcements, or Arkansas state procurement records for Bentonville campus contracts.

high

Is Walmart's physical security infrastructure centrally managed from a corporate SOC, or is it per-store/per-region with local NVR/DVR at each location? The answer determines whether this is a multi-site sprawl displacement or a centralized enterprise deal.

Discovery question to IT leadership or VP of Assets Protection: 'If there's an incident at a store in Gainesville, FL tonight, can your team in Bentonville pull that footage without calling the store manager or VPN-ing into a local server?'

high

Was physical security infrastructure for the 350-acre Bentonville Home Office (12 buildings, opened January 2025) awarded to an incumbent vendor, or is there still an open procurement? None of 8 facility articles mention a security vendor.

Arkansas state procurement records search for Walmart Home Office security contracts. Direct outreach to Bentonville campus facilities team. Check Motorola/Avigilon/Genetec press releases for any Walmart campus reference.

high

Who owns physical security at Walmart, is it the Assets Protection division, IT, or Facilities? Budget authority and champion identification depends on this org chart question.

LinkedIn search for 'VP Assets Protection Walmart', 'Director Physical Security Walmart', 'CISO Walmart'. SEC proxy (DEF 14A) may list executive security officers. Walmart's corporate.walmart.com leadership page.

medium

Has the \$0.8B in self-insured general liability claims (9 months ended October 2025) driven any internal conversation about physical security investment as a liability reduction lever?

Discovery question to CSO or VP Risk Management: 'Has your risk team quantified how upgraded surveillance coverage and incident documentation could affect your self-insurance claims costs?' Source: Walmart 10-Q Q3 FY2026.

What is Walmart's hiring pattern for Assets Protection leadership roles? The 50-job SerpAPI sample captured zero security or LP roles. Walmart's LP hiring is invisible
